

FOR IMMEDIATE RELEASE

PK Safety Supply Adds Real-Time Gas Monitors To Innovative Products Line for Oil and Gas Industry

BW Clip Series Real-Time Gas Detectors from BW Technologies by Honeywell

ALAMEDA, CA – June 20, 2016 – PK Safety Supply announces the addition of real-time gas monitors to the line of innovative products for oil and gas industry that are available immediately. BW Clip Series are exceptionally reliable, maintenance-free gas detectors, specifically engineered for hazardous environments and extreme temperatures found in the oil and gas industry.

The benefits of using this new generation of gas detectors include the real-time digital display of gas levels, the ability to calibrate the device, and the ability to put it into hibernation mode when not in use. H2S and CO models provide up to three years of operation and hibernation capability, and all models are maintenance-free with no need for battery charging or sensor replacement. BW Clip Series Real-Time Gas Detectors are based on Surecell™ and Reflex Technology™. Surecell™ is a unique dual reservoir sensor design that dramatically improves instrument performance, response time, and longevity. Reflex Technology™ is an advanced automated internal test function that routinely checks the operating condition of the sensor to increase safety, up-time, and overall worker confidence. Specifically, there is an automated self-test of battery, sensor and electronics within the BW Clip Series.

The instrument management option with the IntelliDoX Management System combines smart docking modules, updated Firmware V 7.000, and Fleet Manager II 4.3.31 software. It ensures quick bump tests and calibrations, unmatched configurability, enhanced productivity, and the highest level of protection.

“The original version of the BW Clip has been the best selling gas detector in the world for years...period. However, there has been a consistent demand for a version that would display the gas concentration to the user, in real time. At a very reasonable price point, BW Honeywell has done just that,” said Rick Pedley, Owner of PK Safety Supply.

About PK Safety Supply

PK Safety Supply has been keeping people safe for over 65 years. The brands that the company offers have been vetted over the years by customer feedback and experience. PK Safety provides customers with the latest, most dependable technology, the best value for the money, and exceptional support. In addition to selling occupational safety gear, the company is a Factory Authorized Service Center for BW Honeywell, Gas Clip Technologies, RAE Systems, RKI Instruments and Draeger gas monitors.
